Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Indicial Method Calculating Dynamic Stall on a Vertical Axis Wind Turbine B92-136
Numerical Analysis of Flow Through Oscillating Casacade Sections B92-121
Unsteady Airloading Panel Method for Propfans B92-120
Three-Dimensional Viscous Analysis of a Mach 5 Inlet and Comparison with Experimental Data B92-063
Calculation of Three-Dimensional Transonic Turbine Cascade Flow B92-056
Prediction of Periodic Loadings on Single Rotation Propfan with Off-Axis Inflow B92-021
Unsteady Euler Analysis of the Flowfield of a Propfan at an Angle of Attack B92-020

Aeroelasticity and Aeroservoelasticity

Numerical Analysis of Flow Through Oscillating Casacade Sections B92-121

Aerospace Plane

Mixing and Combustion Studies Using Discrete Orifice Injection at Hypervelocity Flight Conditions B92-193
Some Readily Quantifiable Aspects of Scramjet Engine Performance B92-167
Accelerators and Decelerators for Large Hypersonic Aircraft B92-077

Fuels and Fuel Systems

Experimental Techniques for the Assessment of Fuel Thermal Stability B92-174

Ground Support

Accelerators and Decelerators for Large Hypersonic Aircraft B92-077

Landing Dynamics

Accelerators and Decelerators for Large Hypersonic Aircraft B92-077

Manufacturing

Advanced Tube-Bundle Rocket Thrust Chambers B92-117

Powerplant Integration

Maximum Life Spur Gear Design B92-191
Axial Length Influence on the Performance of Centrifugal Impellers B92-187
Row-by-Row Off-Design Performance Calculation Method for Turbines B92-122
Advanced Propulsion Systems for Large Subsonic Transports B92-102

Propeller and Rotor Systems

Unsteady Airloading Panel Method for Propfans B92-120
Structural and Aerodynamic Analysis of a Large-Scale Advanced Propeller Blade B92-054
Role of Dynamic Simulation in Fighter Engine Design and Development B92-030

STOL/VTOL/STOVL

Flow in a Ventral Nozzle for Short Takeoff and Vertical Landing Aircraft B92-075

Testing, Flight and Ground

Comparison of 15-k We Water-Cooled Arcjet Test Results at Two Difference Facilities B92-137

Vibration

Computational Studies of a Superdetonative Ram Accelerator Mode B92-066
High-Temperature Powder-Lubricated Dampers for Gas Turbine Engines B92-065

Energy

Alternate Fuels

Combustion of Methanol and Methanol/Dodecanol Spray Flames B92-080
Limitations on Stored Energy Densities in Systems of Separated Ionic Species B92-005

Flywheels

Combustion Mechanism of a Negative Pressure Exponent Composite Solid Propellant B92-006
Propagation and Fractals of Turbulent Jet Flames B92-003

Hydrogen and Unique Fuels

Investigation of CO2 Laser-Sustained Hydrogen Plasmas B92-168
Lunar-Derived Titanium Alloys for Hydrogen Storage B92-129
Limitations on Stored Energy Densities in Systems of Separated Ionic Species B92-005

Laser Integration/Systems

Laser Propulsion: Research Status and Needs B92-052

Magnetohydrodynamic Power Generation

Plasma Flow Processes Within Magnetic Nozzle Configurations B92-155

Photovoltaic Power

Moonbase Night Power by Laser Illumination B92-036

Reciprocating Machinery

Directions in Turbulence Modeling for In-Cylinder Flows in Reciprocating Engines B92-157

Rotating Machinery

Row-by-Row Off-Design Performance Calculation Method for Turbines B92-122
Flow Visualization and Motion Analysis for a Series of Four Sequential Brush Seals B92-101
New Model for Flow over Open Cavities. Part II: Assessment for Seal Leakage B92-058
New Model for Flow over Open Cavities. Part I: Model Development B92-057
Navier-Stokes Analysis of Turbomachinery Blade External Heat Transfer B92-055
Laser Doppler Velocimeter Measurements in the Vortex Region of a Radial Inflow Turbine B92-026

Solar Power

Magnesium Fluoride as Energy Storage Medium for Spacecraft Solar Thermal Power Systems B92-163
Lunar-Derived Titanium Alloys for Hydrogen Storage B92-129
Analysis of Direct Solar Thermal Rocket Propulsion B92-078

Thermoelectric

Electrode Performance Parameters for a Radioisotope-Powered AMTEC for Space Power Applications B92-131

Wind Power

Indicial Method Calculating Dynamic Stall on a Vertical Axis Wind Turbine B92-136

Fluid Dynamics

Aeroacoustics

Response of Propellant Combustion to a Turbulent Acoustic Boundary Layer B92-043

Boundary Layers and Heat Transfer—Laminar

Investigation of Oblique Shock/Boundary-Layer Bleed Interaction B92-061

Boundary Layers and Heat Transfer—Turbulent

Some Effects of Oscillation Waveform and Amplitude on Unsteady Turbulent Shear Flows B92-098
Study on Turbulence in Interior Ballistics Flows B92-009

Boundary-Layer Stability and Transition

Effect of Three-Dimensionality on Compressible Mixing B92-034

Computational Fluid Dynamics

Study on Vortex Flow Control of Inlet Distortion B92-190
Application of an Unsteady Navier-Stokes Solver to Transonic Turbine Design B92-162
Full Navier-Stokes Analysis of a Three-Dimensional Scramjet Inlet B92-161
Directions in Turbulence Modeling for In-Cylinder Flows in Reciprocating Engines B92-157
Calculation of Particle Trajectories in Solid-Rocket Motors with Arbitrary Acceleration B92-146
Computational Study of a Supersonic Mixer-Ejector Exhaust System B92-141
Flow Establishment in a Generic Scramjet Combustor B92-133
Bleed Boundary Conditions for Numerically Simulated Mixed-Compression Supersonic Inlet Flow B92-128
Numerical Investigation of Supersonic Inlet with Realistic Bleed and Bypass Systems B92-127
Viscous Flow Analysis of Advanced Particle Separators B92-125

Subject Index

Aircraft Technology, Conventional, STOL/VTOL

Aerodynamics

Indicial Method Calculating Dynamic Stall on a Vertical Axis Wind Turbine B92-136
Numerical Analysis of Flow Through Oscillating Casacade Sections B92-121
Unsteady Airloading Panel Method for Propfans B92-120
Three-Dimensional Viscous Analysis of a Mach 5 Inlet and Comparison with Experimental Data B92-063
Calculation of Three-Dimensional Transonic Turbine Cascade Flow B92-056
Prediction of Periodic Loadings on Single Rotation Propfan with Off-Axis Inflow B92-021
Unsteady Euler Analysis of the Flowfield of a Propfan at an Angle of Attack B92-020

Aeroelasticity and Aeroservoelasticity

Numerical Analysis of Flow Through Oscillating Casacade Sections B92-121

Aerospace Plane

Mixing and Combustion Studies Using Discrete Orifice Injection at Hypervelocity Flight Conditions B92-193
Some Readily Quantifiable Aspects of Scramjet Engine Performance B92-167
Accelerators and Decelerators for Large Hypersonic Aircraft B92-077

Fuels and Fuel Systems

Experimental Techniques for the Assessment of Fuel Thermal Stability B92-174

Ground Support

Accelerators and Decelerators for Large Hypersonic Aircraft B92-077

Landing Dynamics

Accelerators and Decelerators for Large Hypersonic Aircraft B92-077

Manufacturing

Advanced Tube-Bundle Rocket Thrust Chambers B92-117

Powerplant Integration

Maximum Life Spur Gear Design B92-191
Axial Length Influence on the Performance of Centrifugal Impellers B92-187
Row-by-Row Off-Design Performance Calculation Method for Turbines B92-122
Advanced Propulsion Systems for Large Subsonic Transports B92-102

Propeller and Rotor Systems

Unsteady Airloading Panel Method for Propfans B92-120
Structural and Aerodynamic Analysis of a Large-Scale Advanced Propeller Blade B92-054
Role of Dynamic Simulation in Fighter Engine Design and Development B92-030

STOL/VTOL/STOVL

Flow in a Ventral Nozzle for Short Takeoff and Vertical Landing Aircraft B92-075

Testing, Flight and Ground

Comparison of 15-k We Water-Cooled Arcjet Test Results at Two Difference Facilities B92-137

Vibration

Computational Studies of a Superdetonative Ram Accelerator Mode B92-066
High-Temperature Powder-Lubricated Dampers for Gas Turbine Engines B92-065

Laser Propulsion: Research Status and Needs B92-052

Magnetohydrodynamic Power Generation

Plasma Flow Processes Within Magnetic Nozzle Configurations B92-155

Photovoltaic Power

Moonbase Night Power by Laser Illumination B92-036

Reciprocating Machinery

Directions in Turbulence Modeling for In-Cylinder Flows in Reciprocating Engines B92-157

Rotating Machinery

Row-by-Row Off-Design Performance Calculation Method for Turbines B92-122
Flow Visualization and Motion Analysis for a Series of Four Sequential Brush Seals B92-101
New Model for Flow over Open Cavities. Part II: Assessment for Seal Leakage B92-058
New Model for Flow over Open Cavities. Part I: Model Development B92-057
Navier-Stokes Analysis of Turbomachinery Blade External Heat Transfer B92-055
Laser Doppler Velocimeter Measurements in the Vortex Region of a Radial Inflow Turbine B92-026

Solar Power

Magnesium Fluoride as Energy Storage Medium for Spacecraft Solar Thermal Power Systems B92-163
Lunar-Derived Titanium Alloys for Hydrogen Storage B92-129
Analysis of Direct Solar Thermal Rocket Propulsion B92-078

Thermoelectric

Electrode Performance Parameters for a Radioisotope-Powered AMTEC for Space Power Applications B92-131

Wind Power

Indicial Method Calculating Dynamic Stall on a Vertical Axis Wind Turbine B92-136

Fluid Dynamics

Aeroacoustics

Response of Propellant Combustion to a Turbulent Acoustic Boundary Layer B92-043

Boundary Layers and Heat Transfer—Laminar

Investigation of Oblique Shock/Boundary-Layer Bleed Interaction B92-061

Boundary Layers and Heat Transfer—Turbulent

Some Effects of Oscillation Waveform and Amplitude on Unsteady Turbulent Shear Flows B92-098
Study on Turbulence in Interior Ballistics Flows B92-009

Boundary-Layer Stability and Transition

Effect of Three-Dimensionality on Compressible Mixing B92-034

Computational Fluid Dynamics

Study on Vortex Flow Control of Inlet Distortion B92-190
Application of an Unsteady Navier-Stokes Solver to Transonic Turbine Design B92-162
Full Navier-Stokes Analysis of a Three-Dimensional Scramjet Inlet B92-161
Directions in Turbulence Modeling for In-Cylinder Flows in Reciprocating Engines B92-157
Calculation of Particle Trajectories in Solid-Rocket Motors with Arbitrary Acceleration B92-146
Computational Study of a Supersonic Mixer-Ejector Exhaust System B92-141
Flow Establishment in a Generic Scramjet Combustor B92-133
Bleed Boundary Conditions for Numerically Simulated Mixed-Compression Supersonic Inlet Flow B92-128
Numerical Investigation of Supersonic Inlet with Realistic Bleed and Bypass Systems B92-127
Viscous Flow Analysis of Advanced Particle Separators B92-125

Navier-Stokes Solutions of Transonic Nozzle Flow with Shock-Induced Flow Separations B92-123
Application of Computational Fluid Dynamics to Pitch/Yaw Thrust Vectoring Spherical Convergent Flap Nozzles B92-119
Numerical Study of the Effects of Reverse Sweep on Scramjet Inlet Performance B92-104
Turbomachinery Unsteady Load Predictions with Nonuniform Inflow B92-097
Flow in a Ventral Nozzle for Short Takeoff and Vertical Landing Aircraft B92-075
Unsteady Analysis of Hot Streak Migration in a Turbine Stage B92-074
Computations of Multispecies Mixing Between Scramjet Nozzle Flow and Hypersonic Freestream B92-071
Evaluation of Parallel Injector Configurations for Mach 2 Combustion B92-070
Three-Dimensional Viscous Analysis of a Mach 5 Inlet and Comparison with Experimental Data B92-063
Multigrid Calculations of a Jet in Crossflow B92-062
Investigation of Oblique Shock/Boundary-Layer Bleed Interaction B92-061
Inviscid and Viscous Transonic Flows in Cascades Using an Implicit Upwind Algorithm B92-059
New Model for Flow over Open Cavities. Part II: Assessment for Seal Leakage B92-058
New Model for Flow over Open Cavities. Part I: Model Development B92-057
Navier-Stokes Analysis of Turbomachinery Blade External Heat Transfer B92-055
Flame Sheet Algorithm for Use in Numerical Modeling of Ramjet Combustion Instability B92-040
Full Navier-Stokes Analysis of a Three-Dimensional Hypersonic Mixed Compression Inlet B92-038
Finite Element Solutions of the Navier-Stokes Equations for Compressible Internal Flows B92-027
Computational Fluid Dynamics Based Three-Dimensional Turbofan Inlet/Fan Cowl Analysis System B92-025
Prediction of Periodic Loadings on Single Rotation Propfan with Off-Axis Inflow B92-021
Unsteady Euler Analysis of the Flowfield of a Propfan at an Angle of Attack B92-020
Study on Turbulence in Interior Ballistics Flows B92-009

Hydrodynamics

Modeling of the Initial Droplet Size Distribution Function in the Spray Formed by Impinging Jets B92-108
Flow Visualization and Motion Analysis for a Series of Four Sequential Brush Seals B92-101

Hypersonic Flow

Mixing and Combustion Studies Using Discrete Orifice Injection at Hypervelocity Flight Conditions B92-193
Experimental Investigation of an Axisymmetric Hypersonic Scramjet Inlet for Laser Propulsion B92-185
Some Readily Quantifiable Aspects of Scramjet Engine Performance B92-167
Least-Squares/Parabolized Navier-Stokes Procedure for Optimizing Hypersonic WInd-Tunnel Nozzles B92-159
Numerical Study of Low-Current Steady Arcs B92-153
Flow Establishment in a Generic Scramjet Combustor B92-133
Numerical Study of the Effects of Reverse Sweep on Scramjet Inlet Performance B92-104
Effect of Three-Dimensionality on Compressible Mixing B92-034
Liquid Fuel Jet in Subsonic Crossflow B92-004

Inlet, Nozzle, Diffusor, and Channel Flows

Study on Vortex Flow Control of Inlet Distortion B92-190
Confined Jet Thrust Vector Control Nozzle Studies B92-186
Full Navier-Stokes Analysis of a Three-Dimensional Scramjet Inlet B92-161
Least-Squares/Parabolized Navier-Stokes Procedure for Optimizing Hypersonic WInd-Tunnel Nozzles B92-159
Numerical Study of Low-Current Steady Arcs B92-153
Computational Study of a Supersonic Mixer-Ejector Exhaust System B92-141
Nozzle Design Using Generalized One-Dimensional Flow B92-139
Bleed Boundary Conditions for Numerically Simulated Mixed-Compression Supersonic Inlet Flow B92-128
Numerical Investigation of Supersonic Inlet with Realistic Bleed and Bypass Systems B92-127
Subcritical Flow Studies on Two-Dimensional External Compression Supersonic Inlets B92-126
Viscous Flow Analysis of Advanced Particle Separators B92-125
Navier-Stokes Solutions of Transonic Nozzle Flow with Shock-Induced Flow Separations B92-123
Application of Computational Fluid Dynamics to Pitch/Yaw Thrust Vectoring Spherical Convergent Flap Nozzles B92-119
Experimental Study of a Two-Dimensional Scramjet Inlet, M∞ = 10.1-25.1 B92-099
Flow in a Ventral Nozzle for Short Takeoff and Vertical Landing Aircraft B92-075
Supersonic Nozzle Mixer Ejector B92-073
Computations of Multispecies Mixing Between Scramjet Nozzle Flow and Hypersonic Freestream B92-071
Multiple Normal Shock Wave/Turbulent Boundary-Layer Interactions B92-064
Three-Dimensional Viscous Analysis of a Mach 5 Inlet and Comparison with Experimental Data B92-063
Experimental Investigation of Terminal Shock Sensors for Mixed-Compression Inlets B92-024
Numerical Investigation of Supersonic Mixed-Compression Inlet Using an Implicit Upwind Scheme B92-023

Jets, Wakes, and Viscid-Inviscid Flow Interactions

Confined Jet Thrust Vector Control Nozzle Studies B92-186
Effects of Vortex Generators on the Growth of a Compressible Shear Layer B92-158
Aerodynamics of Viscous Flow in Counter-Rotating Finite Jets B92-124
Effects of Compressiblity on the Atomization of Liquid Jets B92-110
Planar Fluoresence Imaging of a Transverse Jet in a Supersonic Crossflow B92-109
Modeling of the Initial Droplet Size Distribution Function in the Spray Formed by Impinging Jets B92-108
Wind Tunnel Study of Aerodynamic Characteristics of Base Combustion B92-092
Studies of the Effects of Curvature on Dilution Jet Mixing B92-029
Prediction of Periodic Loadings on Single Rotation Propfan with Off-Axis Inflow B92-021

Multiphase Flows

Dispersed-Phase Structure of Pressure-Atomized Sprays at Various Gas Densities B92-175
Medium-Frequency Impulsive-Thrust-Activated Liquid Hydrogen Reorientation with Geyser B92-150
Effect of Flow Rate on the Spray Characteristics of Impinging Water Jets B92-149
Calculation of Particle Trajectories in Solid-Rocket Motors with Arbitrary Acceleration B92-146
Viscous Flow Analysis of Advanced Particle Separators B92-125
Theoretical Modeling of the Interior Ballistic Processess in an Electrothermal Chemical Gun B92-096
Combustion of Methanol and Methanol/Dodecanol Spray Flames B92-080
Continuous- and Dispersed-Phase Structure of Dense Nonevaporating Pressure-Atomized Sprays B92-042
Study on Turbulence in Interior Ballistics Flows B92-009

Plasmadynamics and MHD

Quantitative Imaging of the Magnetoplasmadynamic Flowfield B92-183
Magnetosonic Condition in Magnetoplasmadynamic Flow B92-181
Quasi-One-Dimensional Numerical Simulation of Magnetoplasmadynamic Thrusters B92-156
Plasma Flow Processes Within Magnetic Nozzle Configurations B92-155
High Current Hollow Cathode Phenomena B92-093
Plasma Particle Simulation of Electrostatic Ion Thrusters B92-053
Techniques for Spectroscopic Measurements in an Arcjet Nozzle B92-037
Electromagnetic Effects in an Applied-Field Magnetoplasmadynamic Thruster B92-015

Rarefied Flows

Satellite Propulsion Performance Modeling Using Flight Data B92-148

Reacting Flows and Combustion

Mixing and Combustion Studies Using Discrete Orifice Injection at Hypervelocity Flight Conditions B92-193
Carbon Monoxide Emissions in Lean Premixed Combustion B92-173
Prediction of LI-SF6 Wick Combustion B92-171

Active Control of Unsteady Combustion-Induced Oscillations B92-166
Numerical Simulation of Wick Diffusion Flames B92-140
Aerodynamics of Viscous Flow in Counter-Rotating Finite Jets B92-124
Wind Tunnel Study of Aerodynamic Characteristics of Base Combustion B92-092
Combustion of Methanol and Methanol/Dodecanol Spray Flames B92-080
Dynamic Stabilization Zone Structure of Jet Diffusion Flames from Liftoff to Blowout B92-079
Evaluation of Parallel Injector Configurations for Mach 2 Combustion B92-070
Flame Configuration Associated with Localized Energy Addition to a Flowing Combustible Mixture B92-067
Flame Sheet Algorithm for Use in Numerical Modeling of Ramjet Combustion Instability B92-040
Techniques for Spectroscopic Measurements in an Arcjet Nozzle B92-037

Separated Flows

Some Effects of Oscillation Waveform and Amplitude on Unsteady Turbulent Shear Flows B92-098
Multigrid Calculations of a Jet in Crossflow B92-062
Full Navier-Stokes Analysis of a Three-Dimensional Hypersonic Mixed Compression Inlet B92-038

Shock Waves and Detonations

Experimental Investigation of Terminal Shock Sensors for Mixed-Compression Inlets B92-024

Subsonic Flow

Study on Vortex Flow Control of Inlet Distortion B92-190
Turbomachinery Unsteady Load Predictions with Nonuniform Inflow B92-097
Multigrid Calculations of a Jet in Crossflow B92-062
Liquid Fuel Jet in Subsonic Crossflow B92-004

Supersonic Flow

Confined Jet Thrust Vector Control Nozzle Studies B92-186
Effects of Vortex Generators on the Growth of a Compressible Shear Layer B92-158
Nozzle Design Using Generalized One-Dimensional Flow B92-139
Subcritical Flow Studies on Two-Dimensional External Compression Supersonic Inlets B92-126
Planar Fluoresence Imaging of a Transverse Jet in a Supersonic Crossflow B92-109
Supersonic Nozzle Mixer Ejector B92-073
Evaluation of Parallel Injector Configurations for Mach 2 Combustion B92-070
Multiple Normal Shock Wave/Turbulent Boundary-Layer Interactions B92-064
Investigation of Oblique Shock/Boundary-Layer Bleed Interaction B92-061
Full Navier-Stokes Analysis of a Three-Dimensional Hypersonic Mixed Compression Inlet B92-038
Effects of Sidewall Disturbances on the Supersonic Mixing Layer B92-035
Experimental Investigation of Terminal Shock Sensors for Mixed-Compression Inlets B92-024
Numerical Investigation of Supersonic Mixed-Compression Inlet Using an Implicit Upwind Scheme B92-023
Numerical and Experimental Investigation of Airframe-Integrated Inlet for High Velocities B92-022

Transonic Flow

Nozzle Design Using Generalized One-Dimensional Flow B92-139
Bleed Boundary Conditions for Numerically Simulated Mixed-Compression Supersonic Inlet Flow B92-128
Navier-Stokes Solutions of Transonic Nozzle Flow with Shock-Induced Flow Separations B92-123
Navier-Stokes Solution of Transonic Cascade Flows Using Nonperiodic C-Type Grids B92-060
Inviscid and Viscous Transonic Flows in Cascades Using an Implicit Upwind Algorithm B92-059
Calculation of Three-Dimensional Transonic Turbine Cascade Flow B92-056

Unsteady Flows

Unsteady Internal Ballistic Calculations of Solid Rocket Motors B92-169
Application of an Unsteady Navier-Stokes Solver to Transonic Turbine Design B92-162
Numerical Simulation of Wick Diffusion Flames B92-140
Indicial Method Calculating Dynamic Stall on a Vertical Axis Wind Turbine B92-136
Mixing and Combustion in a Spinning Combustor B92-118
Some Effects of Oscillation Waveform and Amplitude on Unsteady Turbulent Shear Flows B92-098
Turbomachinery Unsteady Load Predictions with Nonuniform Inflow B92-097
Water Hammer in a Spacecraft Propellant Feed System B92-086
Unsteady Analysis of Hot Streak Migration in a Turbine Stage B92-074
Finite Element Solutions of the Navier-Stokes Equations for Compressible Internal Flows B92-027
Unsteady Euler Analysis of the Flowfield of a Propfan at an Angle of Attack B92-020

Viscous Non-Boundary-Layer Flows

Measured Effect of Step Axial Location on Labyrinth Seal Leakage B92-170
Navier-Stokes Analysis of Turbomachinery Blade External Heat Transfer B92-055

Vortices

Aerodynamics of Viscous Flow in Counter-Rotating Finite Jets B92-124
Flame Sheet Algorithm for Use in Numerical Modeling of Ramjet Combustion Instability B92-040

Wave Motion and Sloshing

Medium-Frequency Impulsive-Thrust-Activated Liquid Hydrogen Reorientation with Geyser B92-150

Guidance, Control, and Dynamics Technology

Control System Design

Application of a Model-Reference Adaptive Controller to a Space Nuclear Power System B92-164

Engine Control

Active Control of Nonlinear Pressure Oscillations in Combustion Chambers B92-192

Spacecraft Guidance and Control

Medium-Frequency Impulsive-Thrust-Excited Slosh Waves During Propellant Reorientation with a Geyser B92-116

Interdisciplinary Topics

Aerospace Management

Historical Perspective: Viking Mars Lander Propulsion B92-048

Aerospace Technology Utilization

Numerical and Experimental Investigation of Airframe-Integrated Inlet for High Velocities B92-022

Analytical and Numerical Methods

Maximum Life Spur Gear Design B92-191
Nonlinear Structural Analysis of Cylindrical Thrust Chambers Using Viscoplastic Models B92-087
Plasma Particle Simulation of Electrostatic Ion Thrusters B92-053

CAD/CAM

Maximum Life Spur Gear Design B92-191

Lasers and Laser Applications

Laser Propulsion: Research Status and Needs B92-052
Moonbase Night Power by Laser Illumination B92-036
Laser Doppler Velocimeter Measurements in the Vortex Region of a Radial Inflow Turbine B92-026
Simultaneous Coherent Anti-Stokes Raman Spectroscopy Measurements in Hydrogen-Fueled Supersonic Combustion B92-002

Reliability, Maintainability, and Logistics Support

Extraterrestrial Materials Processing and Related Transport Phenomena B92-100

Research Facilities and Instrumentation

Generic Developmental Turbojet Fuel Control B92-189
Least-Squares/Parabolized Navier-Stokes Procedure for Optimizing Hypersonic WInd-Tunnel Nozzles B92-159
Evaluation of Supercritical Cryogen Storage and Transfer Systems for Future NASA Missions B92-049

Safety

Evaluation of Supercritical Cryogen Storage and Transfer Systems for Future NASA Missions B92-049
Status of H-II Rocket First Stage Propulsion System B92-047
Combustion Mechanism of a Negative Pressure Exponent Composite Solid Propellant B92-006

Sensor Systems

Electric Field and Radio Frequency Measurements for Rocket Engine Health Monitoring Applications B92-143

Launch Vehicle and Missile (LV/M) Technology

Launch Vehicle and Sounding Rocket Systems

Ram Accelerator Direct Space Launch System: New Concepts B92-069

Propulsion and Propellant Systems

Experimental Investigation of an Axisymmetric Hypersonic Scramjet Inlet for Laser Propulsion B92-185
Metallized Propellants for the Human Exploration of Mars B92-179
Unsteady Internal Ballistic Calculations of Solid Rocket Motors B92-169
Investigation of CO2 Laser-Sustained Hydrogen Plasmas B92-168
U.S. Space Station Freedom Waste Gas Disposal System Trade Study B92-130
Advanced Tube-Bundle Rocket Thrust Chambers B92-117
Pulsed Thrust Propellant Reorientation: Concept and Modeling B92-115
Optimization of Mixture Ratio Distribution in Liquid Propellant Rocket Thrust Chamber B92-088
Water Hammer in a Spacecraft Propellant Feed System B92-086
Predicting Burning Time Variations in Solid Rocket Motors B92-082
Design and Test of an Oxygen Turbopump for a Dual Expander Cycle Rocket Engine B92-012

Testing, Flight and Ground

Generic Developmental Turbojet Fuel Control B92-189
Electric Field and Radio Frequency Measurements for Rocket Engine Health Monitoring Applications B92-143
Motor Case-to-Insulation Unbond Repair Accept/Reject Criterion B92-046
Motor Case-to-Insulation Bond Proof-Test Criterion B92-045

Propulsion

Airbreathing Propulsion

Generic Developmental Turbojet Fuel Control B92-189
Axial Length Influence on the Performance of Centrifugal Impellers B92-187
Carbon Monoxide Emissions in Lean Premixed Combustion B92-173
Measured Effect of Step Axial Location on Labyrinth Seal Leakage B92-170
Application of an Unsteady Navier-Stokes Solver to Transonic Turbine Design B92-162
Experimental Verification of a Secondary Recirculation Zone in a Labyrinth Seal B92-160
Turbulent Diffusion Flame Properties Behind a Backward-Facing Step B92-144
Computational Study of a Supersonic Mixer-Ejector Exhaust System B92-141
Hypersonic Mixing and Combustion Studies in the Hypulse Facility B92-134
Effectiveness of Plasma Torches for Ignition and Flameholding in Scramjet B92-132
Numerical Investigation of Supersonic Inlet with Realistic Bleed and Bypass Systems B92-127
Subcritical Flow Studies on Two-Dimensional External Compression Supersonic Inlets B92-126
Row-by-Row Off-Design Performance Calculation Method for Turbines B92-122
Application of Computational Fluid Dynamics to Pitch/Yaw Thrust Vectoring Spherical Convergent Flap Nozzles B92-119
Mixing and Combustion in a Spinning Combustor B92-118
Temperature Effects on Solid-Fuel Ramjet Fuel Properties and Combustion B92-106
Wave Combustors for Trans-Atmospheric Vehicles B92-103
Advanced Propulsion Systems for Large Subsonic Transports B92-102
Experimental Study of a Two-Dimensional Scramjet Inlet, M∞ = 10.1-25.1 B92-099
Solid-Fuel Ramjet Fuel Regression Rate/Thrust Modulation B92-091
Swirl and Fuel Composition Effects on Boron Combustion in Solid-Fuel Ramjets B92-089
Unsteady Analysis of Hot Streak Migration in a Turbine Stage B92-074
Supersonic Nozzle Mixer Ejector B92-073
Hydrocarbon-Fueled Scramjet Combustor Investigation B92-072
Laser-Initiated Conical Detonation Wave for Supersonic Combustion B92-068
High-Temperature Powder-Lubricated Dampers for Gas Turbine Engines B92-065
Navier-Stokes Solution of Transonic Cascade Flows Using Nonperiodic C-Type Grids B92-060
Inviscid and Viscous Transonic Flows in Cascades Using an Implicit Upwind Algorithm B92-059
Calculation of Three-Dimensional Transonic Turbine Cascade Flow B92-056
Structural and Aerodynamic Analysis of a Large-Scale Advanced Propeller Blade B92-054
Numerical Study of Solid-Fuel Combustion Under Supersonic Crossflows B92-051
Role of Dynamic Simulation in Fighter Engine Design and Development B92-030
Studies of the Effects of Curvature on Dilution Jet Mixing B92-029
Method for the Prediction of Supersonic Compressor Blade Performance B92-028
Finite Element Solutions of the Navier-Stokes Equations for Compressible Internal Flows B92-027
Laser Doppler Velocimeter Measurements in the Vortex Region of a Radial Inflow Turbine B92-026
Computational Fluid Dynamics Based Three-Dimensional Turbofan Inlet/Fan Cowl Analysis System B92-025
Numerical and Experimental Investigation of Airframe-Integrated Inlet for High Velocities B92-022
Estimation of the Maximum Instantaneous Distortion B92-001
Experimental Study on Autoignition in a Scramjet Combustor B91-091

Combustion and Combustor Designs

Noncoaxial Mixing in a Rectangular Duct B92-188
Hydrocarbon-Fuel/Copper Combustion Chamber Liner Compatibility, Corrosion Prevention, and Refurbishment B92-180
Aluminum Agglomeration in Ammonium Perchlorate/Cyclotrimethylene Trinitramine/Aluminum/Hydroxy-Terminated Polybutadiene Propellant Combustion B92-177
Experimental Techniques for the Assessment of Fuel Thermal Stability B92-174
Carbon Monoxide Emissions in Lean Premixed Combustion B92-173
Flame Stabilization in High-Velocity Heterogeneous Fuel-Air Mixtures B92-172
Prediction of LI-SF6 Wick Combustion B92-171
Bipropellant Combustion in a Liquid Rocket Combustion Chamber B92-151
Turbulent Diffusion Flame Properties Behind a Backward-Facing Step B92-144
Approach to Measurements of Flame Spreading over Solid Propellants B92-138
Mixing and Combustion in a Spinning Combustor B92-118
Advanced Tube-Bundle Rocket Thrust Chambers B92-117
Ammonium Nitrate-Magnesium Propellant Combustion and Heat Transfer Mechanisms B92-114
Combustion Characteristics of AP/HTPB Propellants with Burning Rate Modifiers B92-112
Wave Combustors for Trans-Atmospheric Vehicles B92-103
Solid-Fuel Ramjet Fuel Regression Rate/Thrust Modulation B92-091
Similarity and Scale Effects in Solid-Fuel Ramjet Combustors B92-090
Optimization of Mixture Ratio Distribution in Liquid Propellant Rocket Thrust Chamber B92-088
Dynamic Stabilization Zone Structure of Jet Diffusion Flames from Liftoff to Blowout B92-079
Flame Configuration Associated with Localized Energy Addition to a Flowing Combustible Mixture B92-067
Structure and Mixing Properties of Combusting Monopropellant Sprays B92-041
Comparative Numerical Studies on Reynolds and Favre Averagings of Turbulent Diffusion Flame B92-039
Studies of the Effects of Curvature on Dilution Jet Mixing B92-029
Generalized Geometric Analysis of Right Circular Cylindrical Star Perforated and Tapered Grains B92-008
In-Flight Formation of Slag in Spinning Solid Propellant Rocket Motors B92-007
Liquid Fuel Jet in Subsonic Crossflow B92-004

Combustion Instability

Active Control of Nonlinear Pressure Oscillations in Combustion Chambers B92-192
Flame Stabilization in High-Velocity Heterogeneous Fuel-Air Mixtures B92-172
Active Control of Unsteady Combustion-Induced Oscillations B92-166
Numerical Simulation of Wick Diffusion Flames B92-140

Dynamic Stabilization Zone Structure of Jet Diffusion Flames from Liftoff to Blowout B92-079
Response of Propellant Combustion to a Turbulent Acoustic Boundary Layer B92-043
State-Feedback Control of Longitudinal Combustion Instabilities B92-010
Propagation and Fractals of Turbulent Jet Flames B92-003

Droplet Characterization

Dispersed-Phase Structure of Pressure-Atomized Sprays at Various Gas Densities B92-175
Effect of Flow Rate on the Spray Characteristics of Impinging Water Jets B92-149
Continuous- and Dispersed-Phase Structure of Dense Nonevaporating Pressure-Atomized Sprays B92-042
Structure and Mixing Properties of Combusting Monopropellant Sprays B92-041
Investigation of Free-Floating Resonant Cavity Microwave Plasmas for Propulsion B92-016
Multichannel Two-Dimensional Magnetoplasmadynamic Arcjet B92-014

Electric and Advanced Space Propulsion

Electrostatic Propulsion Using C_{60} Molecules B92-194
Anode Power Deposition in Quasisteady Magnetoplasmadynamic Thrusters B92-184
Quantitative Imaging of the Magnetoplasmadynamic Flowfield B92-183
Hall Current Ion-Thruster Performance B92-182
Magnetosonic Condition in Magnetoplasmadynamic Flow B92-181
Quasi-One-Dimensional Numerical Simulation of Magnetoplasmadynamic Thrusters B92-156
Plasma Flow Processes Within Magnetic Nozzle Configurations B92-155
Microwave Waveguide Helium Plasmas for Electrothermal Propulsion B92-154
Comparison of 15-k We Water-Cooled Arcjet Test Results at Two Difference Facilities B92-137
Thrust Performance of a Regeneratively Cooled Low-Power Arcjet Thruster B92-095
Antimatter-Driven Fusion Propulsion Scheme for Solar System Exploration B92-094
High Current Hollow Cathode Phenomena B92-093
Analysis of Direct Solar Thermal Rocket Propulsion B92-078
Plasma Particle Simulation of Electrostatic Ion Thrusters B92-053
Techniques for Spectroscopic Measurements in an Arcjet Nozzle B92-037
Role of Dynamic Simulation in Fighter Engine Design and Development B92-030
Radiation Safety Issues in Single-Stage-To-Orbit Spacecraft Powered by Antimatter Rocket Engines B92-019
Measurements of Electron Energy Distributions in an Ion Thruster B92-018
Three-Dimensional Numerical Model of Ion Optics System B92-017
Electromagnetic Effects in an Applied-Field Magnetoplasmadynamic Thruster B92-015
State-Feedback Control of Longitudinal Combustion Instabilities B92-010
Limitations on Stored Energy Densities in Systems of Separated Ionic Species B92-005

Engine Performance

Axial Length Influence on the Performance of Centrifugal Impellers B92-187
Metallized Propellants for the Human Exploration of Mars B92-179
Measured Effect of Step Axial Location on Labyrinth Seal Leakage B92-170
Satellite Propulsion Performance Modeling Using Flight Data B92-148
Dry Lubrication Applied to the HM7 Engine Hydrogen Bearing B92-147
Electric Field and Radio Frequency Measurements for Rocket Engine Health Monitoring Applications B92-143
Comparison of 15-k We Water-Cooled Arcjet Test Results at Two Difference Facilities B92-137
Advanced Propulsion Systems for Large Subsonic Transports B92-102
New Model for Flow over Open Cavities. Part II: Assessment for Seal Leakage B92-058
New Model for Flow over Open Cavities. Part I: Model Development B92-057
Historical Perspective: Viking Mars Lander Propulsion B92-048
Design and Test of an Oxygen Turbopump for a Dual Expander Cycle Rocket Engine B92-012

Environmental Effects

Magnesium-Neutralized Propellant B92-178
Combustion Mechanism of a Negative Pressure Exponent Composite Solid Propellant B92-006

Fuels and Propellants, Properties of

Electrostatic Propulsion Using C_{60} Molecules B92-194
Hydrocarbon-Fuel/Copper Combustion Chamber Liner Compatibility, Corrosion Prevention, and Refurbishment B92-180
Magnesium-Neutralized Propellant B92-178
Aluminum Agglomeration in Ammonium Perchlorate/Cyclotrimethylene Trinitramine/Aluminum/Hydroxy-Terminated Polybutadiene Propellant Combustion B92-177
Experimental Techniques for the Assessment of Fuel Thermal Stability B92-174
Prediction of LI-SF6 Wick Combustion B92-171
Measured Particulate Behavior in a Subscale Solid Propellant Rocket Motor B92-145
Propellant Production from the Martian Atmosphere B92-135
Combustion Characteristics of AP/HTPB Propellants with Burning Rate Modifiers B92-112
Solid-Propellant Erosive Burning B92-111
Relationships for Motor Temperature Sensitivity B92-107
Temperature Effects on Solid-Fuel Ramjet Fuel Properties and Combustion B92-106
Swirl and Fuel Composition Effects on Boron Combustion in Solid-Fuel Ramjets B92-089
Critical Impact Initiation Energies for Three HTPB Propellants B92-084
Ignition of RDX-Based Solid Propellant Subjected to Crossflow Convective Heating B92-083
Historical Development of Glycidyl Azide Polymer B92-081
Analysis of Plumes of Solid Propellant Combustion Using a Fourier Transform-Infrared Spectrometer B92-076
Evaluation of Supercritical Cryogen Storage and Transfer Systems for Future NASA Missions B92-049
Status of H-II Rocket First Stage Propulsion System B92-047
Structure and Mixing Properties of Combusting Monopropellant Sprays B92-041
Bipropellant Propulsion Performance and Propellant-Remaining Prediction for INSAT-1B B92-011

Ignition and Ignitor Design

Effectiveness of Plasma Torches for Ignition and Flameholding in Scramjet B92-132
Ignition of RDX-Based Solid Propellant Subjected to Crossflow Convective Heating B92-083
Experimental Study on Autoignition in a Scramjet Combustor B91-091

Injector Design and Characterization

Dispersed-Phase Structure of Pressure-Atomized Sprays at Various Gas Densities B92-175
Bipropellant Combustion in a Liquid Rocket Combustion Chamber B92-151
Modeling of the Initial Droplet Size Distribution Function in the Spray Formed by Impinging Jets B92-108
Continuous- and Dispersed-Phase Structure of Dense Nonevaporating Pressure-Atomized Sprays B92-042
Generalized Geometric Analysis of Right Circular Cylindrical Star Perforated and Tapered Grains B92-008
In-Flight Formation of Slag in Spinning Solid Propellant Rocket Motors B92-007

Liquid Rocket Engines and Missile Systems

Hydrocarbon-Fuel/Copper Combustion Chamber Liner Compatibility, Corrosion Prevention, and Refurbishment B92-180
Bipropellant Combustion in a Liquid Rocket Combustion Chamber B92-151
Effect of Flow Rate on the Spray Characteristics of Impinging Water Jets B92-149
Dry Lubrication Applied to the HM7 Engine Hydrogen Bearing B92-147
Propellant Production from the Martian Atmosphere B92-135
Pulsed Thrust Propellant Reorientation: Concept and Modeling B92-115
Optimization of Mixture Ratio Distribution in Liquid Propellant Rocket Thrust Chamber B92-088
Water Hammer in a Spacecraft Propellant Feed System B92-086
Electric Auxiliary Power Unit for Shuttle Evolution B92-032
Design and Test of an Oxygen Turbopump for a Dual Expander Cycle Rocket Engine B92-012

Propulsion Hazards

Critical Impact Initiation Energies for Three HTPB Propellants B92-084
Historical Development of Glycidyl Azide Polymer B92-081
Radiation Safety Issues in Single-Stage-To-Orbit Spacecraft Powered by Antimatter Rocket Engines B92-019

Ramjet Combustors

Flame Stabilization in High-Velocity Heterogeneous Fuel-Air Mixtures B92-172
Investigation of Solid-Fuel, Dual-Mode Combustion Ramjets B92-152
Turbulent Diffusion Flame Properties Behind a Backward-Facing Step B92-144
Temperature Effects on Solid-Fuel Ramjet Fuel Properties and Combustion B92-106
Solid-Fuel Ramjet Fuel Regression Rate/Thrust Modulation B92-091
Similarity and Scale Effects in Solid-Fuel Ramjet Combustors B92-090
Swirl and Fuel Composition Effects on Boron Combustion in Solid-Fuel Ramjets B92-089
Swirl Effects on Confined Flows in Axisymmetric Geometries B92-050

Ramjets and Scramjets

Experimental Investigation of an Axisymmetric Hypersonic Scramjet Inlet for Laser Propulsion B92-185
Some Readily Quantifiable Aspects of Scramjet Engine Performance B92-167
Full Navier-Stokes Analysis of a Three-Dimensional Scramjet Inlet B92-161
Numerical Study of Low-Current Steady Arcs B92-153
Investigation of Solid-Fuel, Dual-Mode Combustion Ramjets B92-152
Hypersonic Mixing and Combustion Studies in the Hypulse Facility B92-134
Flow Establishment in a Generic Scramjet Combustor B92-133
Numerical Study of the Effects of Reverse Sweep on Scramjet Inlet Performance B92-104
Experimental Study of a Two-Dimensional Scramjet Inlet, M∞ = 10.1-25.1 B92-099
Similarity and Scale Effects in Solid-Fuel Ramjet Combustors B92-090
Hydrocarbon-Fueled Scramjet Combustor Investigation B92-072
Computations of Multispecies Mixing Between Scramjet Nozzle Flow and Hypersonic Freestream B92-071
Ram Accelerator Direct Space Launch System: New Concepts B92-069
Multiple Normal Shock Wave/Turbulent Boundary-Layer Interactions B92-064
Numerical Study of Solid-Fuel Combustion Under Supersonic Crossflows B92-051
Effects of Sidewall Disturbances on the Supersonic Mixing Layer B92-035
Simultaneous Coherent Anti-Stokes Raman Spectroscopy Measurements in Hydrogen-Fueled Supersonic Combustion B92-002

Solid Rocket Motors and Missile Systems

Rotational Inviscid Flow in Laterally Burning Solid-Propellant Rocket Motors B92-176
Unsteady Internal Ballistic Calculations of Solid Rocket Motors B92-169
Calculation of Particle Trajectories in Solid-Rocket Motors with Arbitrary Acceleration B92-146
Measured Particulate Behavior in a Subscale Solid Propellant Rocket Motor B92-145
Approach to Measurements of Flame Spreading over Solid Propellants B92-138
Ammonium Nitrate-Magnesium Propellant Combustion and Heat Transfer Mechanisms B92-114
Development of a Generalized Failure Criterion for Viscoelastic Materials B92-113
Combustion Characteristics of AP/HTPB Propellants with Burning Rate Modifiers B92-112
Solid-Propellant Erosive Burning B92-111
Relationships for Motor Temperature Sensitivity B92-107
Method for Reducing Stagnation Pressure Losses in Segmented Solid Rocket Motors B92-105
Critical Impact Initiation Energies for Three HTPB Propellants B92-084
Predicting Burning Time Variations in Solid Rocket Motors B92-082
Historical Development of Glycidyl Azide Polymer B92-081
Motor Case-to-Insulation Unbond Repair Accept/Reject Criterion B92-046
Motor Case-to-Insulation Bond Proof-Test Criterion B92-045
Space Shuttle Redesigned Solid Rocket Booster Structural Dynamic Liftoff Predictions and Correlations B92-044
Response of Propellant Combustion to a Turbulent Acoustic Boundary Layer B92-043

Supersonic Combustion

Investigation of Solid-Fuel, Dual-Mode Combustion Ramjets B92-152
Hypersonic Mixing and Combustion Studies in the Hypulse Facility B92-134
Effectiveness of Plasma Torches for Ignition and Flameholding in Scramjet B92-132
Planar Fluoresence Imaging of a Transverse Jet in a Supersonic Crossflow B92-109
Wave Combustors for Trans-Atmospheric Vehicles B92-103
Hydrocarbon-Fueled Scramjet Combustor Investigation B92-072
Laser-Initiated Conical Detonation Wave for Supersonic Combustion B92-068
Numerical Study of Solid-Fuel Combustion Under Supersonic Crossflows B92-051
Effects of Sidewall Disturbances on the Supersonic Mixing Layer B92-035
Effect of Three-Dimensionality on Compressible Mixing B92-034
Simultaneous Coherent Anti-Stokes Raman Spectroscopy Measurements in Hydrogen-Fueled Supersonic Combustion B92-002
Experimental Study on Autoignition in a Scramjet Combustor B91-091

Transient Combustion and Detonation

Ram Accelerator Direct Space Launch System: New Concepts B92-069
Laser-Initiated Conical Detonation Wave for Supersonic Combustion B92-068

Space Technology

Landers

Historical Perspective: Viking Mars Lander Propulsion B92-048

Mission Design and Analysis

Metallized Propellants for the Human Exploration of Mars B92-179
Extraterrestrial Materials Processing and Related Transport Phenomena B92-100
Figure-of-Merit Approach to Extraterrestrial Resource Utilization B92-033

Space Processing

Full System Engineering Design and Operation of an Oxygen Plant B92-165
Extraterrestrial Materials Processing and Related Transport Phenomena B92-100
Figure-of-Merit Approach to Extraterrestrial Resource Utilization B92-033

Space Systems

U.S. Space Station Freedom Waste Gas Disposal System Trade Study B92-130

Spacecraft Power

Application of a Model-Reference Adaptive Controller to a Space Nuclear Power System B92-164
Magnesium Fluoride as Energy Storage Medium for Spacecraft Solar Thermal Power Systems B92-163
Medium-Frequency Impulsive-Thrust-Activated Liquid Hydrogen Reorientation with Geyser B92-150
Electrode Performance Parameters for a Radioisotope-Powered AMTEC for Space Power Applications B92-131
Medium-Frequency Impulsive-Thrust-Excited Slosh Waves During Propellant Reorientation with a Geyser B92-116
Moonbase Night Power by Laser Illumination B92-036
Electric Auxiliary Power Unit for Shuttle Evolution B92-032

Spacecraft Propulsion System Integration

U.S. Space Station Freedom Waste Gas Disposal System Trade Study B92-130
Medium-Frequency Impulsive-Thrust-Excited Slosh Waves During Propellant Reorientation with a Geyser B92-116
Pulsed Thrust Propellant Reorientation: Concept and Modeling B92-115

Spacecraft Radiation Protection

Radiation Safety Issues in Single-Stage-To-Orbit Spacecraft Powered by Antimatter Rocket Engines B92-019

Spacecraft Structural Configuration, Design, and Analysis

Development of a Generalized Failure Criterion for Viscoelastic Materials B92-113

Structural Mechanics and Materials

Aeroelasticity and Control

Structural and Aerodynamic Analysis of a Large-Scale Advanced Propeller Blade B92-054

Dynamic Model Analysis

Space Shuttle Redesigned Solid Rocket Booster Structural Dynamic Liftoff Predictions and Correlations B92-044

Flexible and Active Structures

Flow Visualization and Motion Analysis for a Series of Four Sequential Brush Seals B92-101

Materials Structural Properties

Nonlinear Viscoelastic Constitutive Model for Solid Propellant B92-085
Probabilistic Constitutive Relationships for Cyclic Material Strength Models B92-031
Long-Life Assessment of Graphite/Epoxy Materials for Space Station Freedom Pressure Vessels B92-013

Structural Composite Materials

Long-Life Assessment of Graphite/Epoxy Materials for Space Station Freedom Pressure Vessels B92-013

Structural Durability (including Fatigue and Fracture, and Environmental Degradation)

Development of a Generalized Failure Criterion for Viscoelastic Materials B92-113
Nonlinear Structural Analysis of Cylindrical Thrust Chambers Using Viscoplastic Models B92-087
Probabilistic Constitutive Relationships for Cyclic Material Strength Models B92-031
Long-Life Assessment of Graphite/Epoxy Materials for Space Station Freedom Pressure Vessels B92-013

Structural Dynamics and Characterization

Space Shuttle Redesigned Solid Rocket Booster Structural Dynamic Liftoff Predictions and Correlations B92-044

Structural Finite Elements

Nonlinear Structural Analysis of Cylindrical Thrust Chambers Using Viscoplastic Models B92-087
Nonlinear Viscoelastic Constitutive Model for Solid Propellant B92-085

Structural Modeling

Probabilistic Constitutive Relationships for Cyclic Material Strength Models B92-031

Thermophysics and Heat Transfer

Ablation, Pyrolysis, Thermal Decomposition and Degradation

Solid-Propellant Erosive Burning B92-111

Aerothermodynamics/Thermal Protection

Propagation and Fractals of Turbulent Jet Flames B92-003

Computational Heat Transfer

Analysis of Direct Solar Thermal Rocket Propulsion B92-078

Forced Convection

Ignition of RDX-Based Solid Propellant Subjected to Crossflow Convective Heating B92-083

Laser Interaction

Investigation of CO2 Laser-Sustained Hydrogen Plasmas B92-168

Nonintrusive Diagnostics

Spectrally Resolved Rayleigh Scattering Diagnostic for Hydrogen—Oxygen Rocket Plume Studies B92-142
Approach to Measurements of Flame Spreading over Solid Propellants B92-138

Radiation in Participating Media

Analysis of Plumes of Solid Propellant Combustion Using a Fourier Transform-Infrared Spectrometer B92-076

Thermal Control

Dry Lubrication Applied to the HM7 Engine Hydrogen Bearing B92-147

Thermal Modeling and Analysis

Theoretical Modeling of the Interior Ballistic Processess in an Electrothermal Chemical Gun B92-096

Chronological Index

B91-091 Experimental Study on Autoignition in a Scramjet Combustor. Yukinori Sato and Masami Sayama, *Ishikawajima-Harima Heavy Industries Company, Ltd., Japan*; Goro Masuya, Tomoyuki Komuro, Kenji Kudou, Atsuo Murakami, Kouichiro Tani and Nobuo Chinzei, *National Aerospace Laboratory, Kakuda Research Center, Japan* (7, 5, p. 657) Synoptic based on AIAA Paper 89-7058
Technical Comment by F. Suttrop, *Fachhochschule Aachen, Germany* (8, 6, p. 1300)

B92-001 Estimation of the Maximum Instantaneous Distortion. D. W. Liang and S. Y. Zhang, *Nanjing Aeronautical Institute, PRC* (8, 1, p. 5) Synoptic

B92-002 Simultaneous Coherent Anti-Stokes Raman Spectroscopy Measurements in Hydrogen-Fueled Supersonic Combustion. Torger J. Anderson and Alan C. Eckbreth, *United Technologies Research Center* (8, 1, p. 7) Article based on AIAA Paper 90-0158

B92-003 Propagation and Fractals of Turbulent Jet Flames. Tzong H. Chen and Larry P. Goss, *Systems Research Laboratories, Inc.* (8, 1, p. 16) Article based on AIAA Paper 89-2524

B92-004 Liquid Fuel Jet in Subsonic Crossflow. T. T. Nguyen and A. R. Karagozian, *University of California, Los Angeles* (8, 1, p. 21) Article based on AIAA Paper 90-0445

B92-005 Limitations on Stored Energy Densities in Systems of Separated Ionic Species. Mario E. Fajardo, *Astronautics Laboratory, Edwards AFB* (8, 1, p. 30) Article

B92-006 Combustion Mechanism of a Negative Pressure Exponent Composite Solid Propellant. Jinqi Yin, Baoxuan Li, Kexiu Wang and Buxue Chen, *Northwestern Polytechnical University, PRC* (8, 1, p. 37) Article based on AIAA Paper 88-3298

B92-007 In-Flight Formation of Slag in Spinning Solid Propellant Rocket Motors. Rudolf X. Meyer, *University of California at Los Angeles* (8, 1, p. 45) Article

B92-008 Generalized Geometric Analysis of Right Circular Cylindrical Star Perforated and Tapered Grains. Andrea Ricciardi, *Agenzia Spaziale Italiana, Italy* (8, 1, p. 51) Article based on AIAA Paper 89-2783

B92-009 Study on Turbulence in Interior Ballistics Flows. R. Heiser and J. Garloff, *Fraunhofer-Institut für Kurzzeitdynamik, Ernst-Mach Institut, Germany* (8, 1, p. 59) Article based on AIAA Paper 89-2557

B92-010 State-Feedback Control of Longitudinal Combustion Instabilities. Vigor Yang, Alok Sinha and Youn-Tih Fung, *Pennsylvania State University* (8, 1, p. 66) Article

B92-011 Bipropellant Propulsion Performance and Propellant-Remaining Prediction for INSAT-1B. Tso Ping Yeh, *Space Systems/Loral* (8, 1, p. 74) Article based on AIAA Paper 89-2512

B92-012 Design and Test of an Oxygen Turbopump for a Dual Expander Cycle Rocket Engine. P. S. Buckmann, N. R. Shrimp and F. Viteri, *Aerojet TechSystems*; and M. Proctor, *NASA Lewis Research Center* (8, 1, p. 80) Article based on AIAA Paper 89-2305

B92-013 Long-Life Assessment of Graphite/Epoxy Materials for Space Station Freedom Pressure Vessels. Donald A. Thomas, *NASA Johnson Space Center* (8, 1, p. 87) Article

B92-014 Multichannel Two-Dimensional Magnetoplasmadynamic Arcjet. K. Toki, M. Sumida and K. Kuriki, *Institute of Space and Astronautical Science, Japan* (8, 1, p. 93) Article based on AIAA Paper 87-1000 CP863

B92-015 Electromagnetic Effects in an Applied-Field Magnetoplasmadynamic Thruster. A. Sasoh and Y. Arakawa, *University of Tokyo, Japan* (8, 1, p. 98) Article

B92-016 Investigation of Free-Floating Resonant Cavity Microwave Plasmas for Propulsion. Phil Balaam and Michael M. Micci, *Pennsylvania State University* (8, 1, p. 103) Article based on AIAA Paper 89-2380

B92-017 Three-Dimensional Numerical Model of Ion Optics System. Yukio Hayakawa, *National Aerospace Laboratory, Japan* (8, 1, p. 110) Article based on AIAA Paper 90-2648

B92-018 Measurements of Electron Energy Distributions in an Ion Thruster. Y. Hayakawa, K. Miyazaki and S. Kitamura, *National Aerospace Laboratory, Japan* (8, 1, p. 118) Article based on AIAA Paper 89-2715

B92-019 Radiation Safety Issues in Single-Stage-To-Orbit Spacecraft Powered by Antimatter Rocket Engines. Christopher Tarpley, Mark J. Lewis and Ajay P. Kothari, *University of Maryland* (8, 1, p. 127) Article based on AIAA Paper 90-2365

B92-020 Unsteady Euler Analysis of the Flowfield of a Propfan at an Angle of Attack. M. Nallasamy, *Sverdrup Technology, Inc.*; and J. F. Groeneweg, *NASA Lewis Research Center* (8, 1, p. 136) Article based on AIAA Paper 90-0339

B92-021 Prediction of Periodic Loadings on Single Rotation Propfan with Off-Axis Inflow. Shih H. Chen, *Rockwell International Corporation* (8, 1, p. 144) Article based on AIAA Paper 89-2694

B92-022 Numerical and Experimental Investigation of Airframe-Integrated Inlet for High Velocities. V. A. Vinogradov and V. A. Stepanov, *Central Institute of Aviation Motors, USSR*; and E. V. Alexandrovich, *Central Air and Hydrodynamic Institute, USSR* (8, 1, p. 151) Article based on AIAA Paper 89-2679

B92-023 Numerical Investigation of Supersonic Mixed-Compression Inlet Using an Implicit Upwind Scheme. Jyh-Jang Chan and Shen-Min Liang, *National Cheng Kung University, ROC* (8, 1, p. 158) Article

B92-024 Experimental Investigation of Terminal Shock Sensors for Mixed-Compression Inlets. Miklos Sajben, John F. Donovan and Martin J. Morris, *McDonnell Douglas Research Laboratories* (8, 1, p. 168) Article based on AIAA Paper 90-1931

B92-025 Computational Fluid Dynamics Based Three-Dimensional Turbofan Inlet/Fan Cowl Analysis System. K. Uenishi, M. S. Pearson, T. R. Lehnig and R. M. Leon, *General Electric Aircraft Engines* (8, 1, p. 175) Article based on AIAA Paper 90-3081 CP908

B92-026 Laser Doppler Velocimeter Measurements in the Vortex Region of a Radial Inflow Turbine. A. N. Lakshminarasimha, W. Tabakoff and M. Metwally, *University of Cincinnati* (8, 1, p. 184) Article based on AIAA Paper 89-1823

B92-027 Finite Element Solutions of the Navier-Stokes Equations for Compressible Internal Flows. M. F. Peeters, W. G. Habashi, B. Q. Nguyen and P. L. Kotiuga, *Pratt & Whitney Canada Inc.* (8, 1, p. 192) Article based on AIAA Paper 90-0441

B92-028 Method for the Prediction of Supersonic Compressor Blade Performance. C. Freeman, *Rolls Royce plc, England, UK*; and N. A. Cumpsty, *University of Cambridge, England, UK* (8, 1, p. 199) Article

B92-029 Studies of the Effects of Curvature on Dilution Jet Mixing. James D. Holdeman, *NASA Lewis Research Center*; Ram Srinivasan, Robert S. Reynolds and Craig D. White, *Allied-Signal Aerospace Company* (8, 1, p. 209) Article based on AIAA Paper 87-1953

B92-030 Role of Dynamic Simulation in Fighter Engine Design and Development. S. J. Khalid, *Pratt & Whitney* (8, 1, p. 219) Article based on AIAA Paper 89-2467

B92-031 Probabilistic Constitutive Relationships for Cyclic Material Strength Models. L. Boyce, *University of Texas at San Antonio*; and C. C. Chamis, *NASA Lewis Research Center* (8, 1, p. 227) Article based on AIAA Paper 88-2376

B92-032 Electric Auxiliary Power Unit for Shuttle Evolution. Doug Meyer and Kent Weber, *Sundstrand Aerospace*; and Walter Scott, *NASA Johnson Space Center* (8, 1, p. 233) Article based on AIAA Paper 89-2519

B92-033 Figure-of-Merit Approach to Extraterrestrial Resource Utilization. Kumar Ramohalli, Thomas Kirsch and Bruce Preiss, *University of Arizona* (8, 1, p. 240) Article

B92-034 Effect of Three-Dimensionality on Compressible Mixing. Dimitri Papamoschou, *University of California, Irvine* (8, 1, p. 247) Technical Note

B92-035 Effects of Sidewall Disturbances on the Supersonic Mixing Layer. N. T. Clemens and M. G. Mungal, *Stanford University* (8, 1, p. 249) Technical Note

B92-036 Moonbase Night Power by Laser Illumination. Geoffrey A. Landis, *Sverdrup Technology, Inc.* (8, 1, p. 251) Technical Note

B92-037 Techniques for Spectroscopic Measurements in an Arcjet Nozzle. Dieter M. Zube and Roger M. Myers, *NASA Lewis Research Center* (8, 1, p. 254) Technical Note

B92-038 Full Navier-Stokes Analysis of a Three-Dimensional Hypersonic Mixed Compression Inlet. Jeffery A. White and Chae M. Rhie, *Pratt & Whitney, United Technologies Corporation* (8, 2, p. 257) Article based on AIAA Paper 88-3077

B92-039 Comparative Numerical Studies on Reynolds and Favre Averagings of Turbulent Diffusion Flame. H. C. Soong and H. W. Han, *Chung-Shan Institute of Science and Technology, ROC*; and K. C. Chang, *National Cheng-Kung University, ROC* (8, 2, p. 259) Article based on AIAA Paper 90-1854

B92-040 Flame Sheet Algorithm for Use in Numerical Modeling of Ramjet Combustion Instability. Luc Bauwens, *University of California at Berkeley*; and John W. Daily, *University of Colorado at Boulder* (8, 2, p. 264) Article based on AIAA Paper 90-0647

B92-041 Structure and Mixing Properties of Combusting Monopropellant Sprays. T.-W. Lee and G. M. Faeth, *University of Michigan* (8, 2, p. 271) Article based on AIAA Paper 90-0463

B92-042 Continuous- and Dispersed-Phase Structure of Dense Nonevaporating Pressure-Atomized Sprays. G. A. Ruff, P.-K. Wu, L. P. Bernal and G. M. Faeth, *University of Michigan* (8, 2, p. 280) Article based on AIAA Paper 90-0464

B92-043 Response of Propellant Combustion to a Turbulent Acoustic Boundary Layer. Robert A. Beddini and Ted A. Roberts, *University of Illinois at Urbana-Champaign* (8, 2, p. 290) Article based on AIAA Paper 88-2942

B92-044 Space Shuttle Redesigned Solid Rocket Booster Structural Dynamic Liftoff Predictions and Correlations. Vicki B. Call and Donald R. Mason, *Thiokol Corporation, Space Operations* (8, 2, p. 297) Article based on AIAA Paper 90-2081

B92-045 Motor Case-to-Insulation Bond Proof-Test Criterion. E. Pierre-Louis, S. R. Lin and N. R. Patel, *The Aerospace Corporation* (8, 2, p. 303) Article based on AIAA Paper 90-2206

B92-046 Motor Case-to-Insulation Unbond Repair Accept/Reject Criterion. N. R. Patel, S. R. Lin, S. N. Sallam and E. Pierre-Louis, *The Aerospace Corporation* (8, 2, p. 308) Article based on AIAA Paper 90-2208

B92-047 Status of H-II Rocket First Stage Propulsion System. H. Nagai and K. Noda, *National Space Development Agency of Japan*; I. Yamazaki and T. Mori, *Nagoya Aircraft Works, Mitsubishi Heavy Industries, Ltd., Japan* (8, 2, p. 313) Article based on AIAA Paper 88-2933

B92-048 Historical Perspective: Viking Mars Lander Propulsion. Donald C. Morrisey, *Rocket Research Company* (8, 2, p. 320) Article based on AIAA Paper 89-2391

B92-049 Evaluation of Supercritical Cryogen Storage and Transfer Systems for Future NASA Missions. Hugh Arif, John C. Aydelott and David J. Chato, *NASA Lewis Research Center* (8, 2, p. 332) Article based on AIAA Paper 90-0719

B92-050 Swirl Effects on Confined Flows in Axisymmetric Geometries. S. A. Ahmed and A. S. Nejad, *Wright Research and Development Center, Wright-Patterson AFB* (8, 2, p. 339) Article

B92-051 Numerical Study of Solid-Fuel Combustion Under Supersonic Crossflows. T. A. Jarymowycz, V. Yang and K. K. Kuo, *Pennsylvania State University* (8, 2, p. 346) Article based on AIAA Paper 90-2076

B92-052 Laser Propulsion: Research Status and Needs. Mitat A. Birkan, *Air Force Office of Scientific Research, Bolling AFB* (8, 2, p. 354) Article

B92-053 Plasma Particle Simulation of Electrostatic Ion Thrusters. Xiaohang Peng and Dennis Keefer, *University of Tennessee Space Institute*; and Wilhelmus M. Ruyten, *University of Tennessee—Calspan Center for Space Transportation and Applied Research* (8, 2, p. 361) Article based on AIAA Paper 90-2647

B92-054 Structural and Aerodynamic Analysis of a Large-Scale Advanced Propeller Blade. O. Yamamoto and R. August, *Sverdrup Technology, Inc.* (8, 2, p. 367) Article based on AIAA Paper 90-2401

B92-055 Navier-Stokes Analysis of Turbomachinery Blade External Heat Transfer. A. A. Ameri, *Cleveland State University*; P. M. Sockol, *NASA Lewis Research Center*; and R. S. R. Gorla, *Cleveland State University* (8, 2, p. 374) Article

B92-056 Calculation of Three-Dimensional Transonic Turbine Cascade Flow. H. Zimmermann, *DLR Institut für Theoretische Strömungsmechanik, Germany* (8, 2, p. 382) Article based on AIAA Paper 90-1542

B92-057 New Model for Flow over Open Cavities. Part I: Model Development. D. L. Rhode and R. I. Hibbs, *Texas A&M University* (8, 2, p. 392) Article based on AIAA Paper 89-2806

B92-058 New Model for Flow over Open Cavities. Part II: Assessment for Seal Leakage. D. L. Rhode and R. I. Hibbs, *Texas A&M University* (8, 2, p. 398) Article based on AIAA Paper 89-2807

B92-059 Inviscid and Viscous Transonic Flows in Cascades Using an Implicit Upwind Algorithm. Hannes Benetschik and Heinz E. Gallus, *Institut für Strahlantriebe und Turboarbeitsmaschinen, Germany* (8, 2, p. 403) Article based on AIAA Paper 90-2128

B92-060 Navier-Stokes Solution of Transonic Cascade Flows Using Nonperiodic C-Type Grids. Andrea Arnone, *University of Florence, Italy*; Meng-Sing Liou and Louis A. Povinelli, *NASA Lewis Research Center* (8, 2, p. 410) Article based on AIAA Paper 00100

B92-061 Investigation of Oblique Shock/Boundary-Layer Bleed Interaction. A. Hamed and T. Lehnig, *University of Cincinnati* (8, 2, p. 418) Article based on AIAA Paper 90-1928

B92-062 Multigrid Calculations of a Jet in Crossflow. R. W. Claus, *NASA Lewis Research Center*; and S. P. Vanka, *University of Illinois at Urbana-Champaign* (8, 2, p. 425) Article based on AIAA Paper 90-0444

B92-063 Three-Dimensional Viscous Analysis of a Mach 5 Inlet and Comparison with Experimental Data. D. R. Reddy, *Sverdrup Technology, Inc., Lewis Research Center, Group Center*; and L. J. Weir, *NASA Lewis Research Center* (8, 2, p. 432) Article based on AIAA Paper 90-0600

B92-064 Multiple Normal Shock Wave/Turbulent Boundary-Layer Interactions. Bruce F. Carroll, *University of Florida*; and J. Craig Dutton, *University of Illinois at Urbana-Champaign* (8, 2, p. 441) Article

B92-065 High-Temperature Powder-Lubricated Dampers for Gas Turbine Engines. H. Heshmat and J. F. Walton, *Mechanical Technology Inc.* (8, 2, p. 449) Article based on AIAA Paper 90-2048

B92-066 Computational Studies of a Superdetonative Ram Accelerator Mode. S. Yungster and A. P. Bruckner, *University of Washington* (8, 2, p. 457) Article based on AIAA Paper 89-2677

B92-067 Flame Configuration Associated with Localized Energy Addition to a Flowing Combustible Mixture. F. E. Fendell, E. Y. Kung and M. W. Sheffield, *TRW Space and Technology Group* (8, 2, p. 464) Article

B92-068 Laser-Initiated Conical Detonation Wave for Supersonic Combustion. G. Carrier, F. Fendell, R. McGregor, S. Cook and M. Vazirani, *TRW Space and Technology Group* (8, 2, p. 472) Article based on AIAA Paper 91-0578

B92-069 Ram Accelerator Direct Space Launch System: New Concepts. David W. Bogdanoff, *Eloret Institute* (8, 2, p. 481) Article

B92-070 Evaluation of Parallel Injector Configurations for Mach 2 Combustion. G. Burton Northam, *NASA Langley Research Center*; I. Greenberg and C. S. Byington, *George Washington University*; and D. P. Capriotti, *Analytical Services and Materials* (8, 2, p. 491) Article based on AIAA Paper 89-2525

B92-071 Computations of Multispecies Mixing Between Scramjet Nozzle Flow and Hypersonic Freestream. Oktay Baysal, Mohamed E. Eleshaky and Walter C. Engelund, *Old Dominion University* (8, 2, p. 500) Article based on AIAA Paper 89-0009

B92-072 Hydrocarbon-Fueled Scramjet Combustor Investigation. I. W. Kay, W. T. Peschke and R. N. Guile, *United Technologies Research Center* (8, 2, p. 507) Article based on AIAA Paper 90-2337

B92-073 Supersonic Nozzle Mixer Ejector. T. G. Tillman and R. W. Paterson, *United Technologies Research Center*; and W. M. Presz Jr., *Western New England College* (8, 2, p. 513) Article based on AIAA Paper 89-2925

B92-074 Unsteady Analysis of Hot Streak Migration in a Turbine Stage. Daniel J. Dorney, Roger L. Davis and David E. Edwards, *United Technologies Research Center*; and Nateri K. Madavan, *NASA Ames Research Center* (8, 2, p. 520) Article based on AIAA Paper 90-2354

B92-075 Flow in a Ventral Nozzle for Short Takeoff and Vertical Landing Aircraft. Crawford F. Smith, *Sverdrup Technology, Inc., Lewis Research Center Group*; and Jack G. McArdle, *NASA Lewis Research Center* (8, 2, p. 530) Article based on AIAA Paper 90-1899

B92-076 Analysis of Plumes of Solid Propellant Combustion Using a Fourier Transform-Infrared Spectrometer. S. Klotz, S. T. Thynell, I.-T. Huang and K. K. Kuo, *Pennsylvania State University* (8, 3, p. 537) Synoptic based on AIAA Paper 90-1850

B92-077 Accelerators and Decelerators for Large Hypersonic Aircraft. Edward Lantz, *Consultant* (8, 3, p. 539) Synoptic based on AIAA Paper 90-1986

B92-078 Analysis of Direct Solar Thermal Rocket Propulsion. Sankaran Venkateswaran, Charles L. Merkle and Stefan T. Thynell, *Pennsylvania State University* (8, 3, p. 541) Article

B92-079 Dynamic Stabilization Zone Structure of Jet Diffusion Flames from Liftoff to Blowout. Tzong H. Chen and Larry P. Goss, *Systems Research Laboratories, Inc.*; Douglas G. Talley, *University of Michigan*; and David W. Mikolaitis, *University of Florida* (8, 3, p. 548) Article based on AIAA Paper 89-0153

B92-080 Combustion of Methanol and Methanol/Dodecanol Spray Flames. C. Presser, *National Institute of Standards and Technology*; A. K. Gupta, *University of Maryland*; C. T. Avedisian, *Cornell University*; and H. G. Semerjian, *National Institute of Standards and Technology* (8, 3, p. 553) Article based on AIAA Paper 90-2446

B92-081 Historical Development of Glycidyl Azide Polymer. M. B. Frankel, L. R. Grant and J. E. Flanagan, *Rockwell International Corporation* (8, 3, p. 560) Article based on AIAA Paper 89-2307

B92-082 Predicting Burning Time Variations in Solid Rocket Motors. S. D. Heister, *Purdue University*; and R. J. Davis, *The Aerospace Corporation* (8, 3, p. 564) Article

B92-083 Ignition of RDX-Based Solid Propellant Subjected to Crossflow Convective Heating. Steven J. Ritchie, Wen-Hsin Hsieh and Kenneth K. Kuo, *Pennsylvania State University* (8, 3, p. 570) Article

B92-084 Critical Impact Initiation Energies for Three HTPB Propellants. P. J. Baker, *Vanderbilt Univerity*; A. M. Mellor, *Vanderbilt University*; and C. S. Coffey, *Naval Surface Warfare Center* (8, 3, p. 578) Article based on AIAA Paper 90-2196

B92-085 Nonlinear Viscoelastic Constitutive Model for Solid Propellant. M. A. Burke and P. J. Woytowitz, *Failure Analysis Associates, Inc.*; and Gianfranco Reggi, *BPD Difesa E Spazio Collefero, Italy* (8, 3, p. 586) Article based on AIAA Paper 90-2213

B92-086 Water Hammer in a Spacecraft Propellant Feed System. R. P. Prickett, *INTELSAT*; E. Mayer and J. Hermel, *Hughes Aircraft Company* (8, 3, p. 592) Article based on AIAA Paper 88-2920

B92-087 Nonlinear Structural Analysis of Cylindrical Thrust Chambers Using Viscoplastic Models. Vinod K. Arya, *University of Toledo* (8, 3, p. 598) Article

B92-088 Optimization of Mixture Ratio Distribution in Liquid Propellant Rocket Thrust Chamber. K. Ramamurthi and A. Jayashree, *Liquid Propulsion Systems Centre, India* (8, 3, p. 605) Article

B92-089 Swirl and Fuel Composition Effects on Boron Combustion in Solid-Fuel Ramjets. R. Pein and F. Vinnemeier, *DLR, Institute for Chemical Propulsion and Engineering, Germany* (8, 3, p. 609) Article based on AIAA Paper 89-2885

B92-090 Similarity and Scale Effects in Solid-Fuel Ramjet Combustors. Rachel Ben-Arosh and Alon Gany, *Technion —Israel Institute of Technology* (8, 3, p. 615) Article

B92-091 Solid-Fuel Ramjet Fuel Regression Rate/Thrust Modulation. W. H. Campbell Jr., B. N. Ko, S. R. Lowe and D. W. Netzer, *Naval Postgraduate School* (8, 3, p. 624) Article

B92-092 Wind Tunnel Study of Aerodynamic Characteristics of Base Combustion. Zesheng Ding, Shaosong Chen, Yafei Liu, Rong Luo and Jingyuan Li, *East China Institute of Technology, PRC* (8, 3, p. 630) Article

B92-093 High Current Hollow Cathode Phenomena. Verlin J. Friedly, *UT-Calspan, Center for Space Transportation and Applied Research*; and Paul J. Wilbur, *Colorado State University* (8, 3, p. 635) Article based on AIAA Paper 90-2587

B92-094 Antimatter-Driven Fusion Propulsion Scheme for Solar System Exploration. T. Kammash and D. L. Galbraith, *University of Michigan* (8, 3, p. 644) Article based on AIAA Paper 90-2509

B92-095 Thrust Performance of a Regeneratively Cooled Low-Power Arcjet Thruster. Tetsuya Yamada, Yukio Shimizu, Kyoichiro Toki and Kyoichi Kuriki, *Institute of Space and Astronautical Science, Japan* (8, 3, p. 650) Article based on AIAA Paper 90-2581

B92-096 Theoretical Modeling of the Interior Ballistic Processess in an Electrothermal Chemical Gun. J. L. Chen, K. K. Kuo and F. B. Cheung, *Pennsylvania State University* (8, 3, p. 655) Article

B92-097 Turbomachinery Unsteady Load Predictions with Nonuniform Inflow. Shih H. Chen, *Rockwell International Corporation* (8, 3, p. 667) Article based on AIAA Paper 89-0450

B92-098 Some Effects of Oscillation Waveform and Amplitude on Unsteady Turbulent Shear Flows. Naval K. Agarwal, Roger L. Simpson and B. G. Shivaprasad, *Virginia Polytechnic Institute and State University* (8, 3, p. 674) Article

B92-099 Experimental Study of a Two-Dimensional Scramjet Inlet, $M\infty = 10.1$-25.1. M. A. S. Minucci, *Instituto de Estudos Avançados—CTA, Brazil*; and H. T. Nagamatsu, *Rensselaer Polytechnic Institute* (8, 3, p. 680) Article based on AIAA Paper 90-0091

B92-100 Extraterrestrial Materials Processing and Related Transport Phenomena. K. N. R. Ramohalli and K. R. Sridhar, *University of Arizona* (8, 3, p. 687) Article based on AIAA Paper 91-0309

B92-101 Flow Visualization and Motion Analysis for a Series of Four Sequential Brush Seals. M. J. Braun and V. A. Canacci, *University of Akron*; and R. C. Hendricks, *NASA Lewis Research Center* (8, 3, p. 697) Article based on AIAA Paper 90-2482

B92-102 Advanced Propulsion Systems for Large Subsonic Transports. N. J. Peacock and J. H. R. Sadler, *Rolls Royce PLC, England, UK* (8, 3, p. 703) Article based on AIAA Paper 89-2477

B92-103 Wave Combustors for Trans-Atmospheric Vehicles. Gene P. Menees, *NASA Ames Research Center*; Henry G. Adelman and Jean-Luc Cambier, *Eloret Institute*; and Jeffrey V. Bowles, *NASA Ames Research Center* (8, 3, p. 709) Article

B92-104 Numerical Study of the Effects of Reverse Sweep on Scramjet Inlet Performance. Ajay Kumar, *NASA Langley Research Center*; D. J. Singh, *Analytical Services and Materials, Inc.*; and Carl A. Trexler, *NASA Langley Research Center* (8, 3, p. 714) Article based on AIAA Paper 90-2218

B92-105 Method for Reducing Stagnation Pressure Losses in Segmented Solid Rocket Motors. W. A. Johnston, *The Aerospace Corporation* (8, 3, p. 720) Technical Note

B92-106 Temperature Effects on Solid-Fuel Ramjet Fuel Properties and Combustion. Tae-Ho Lee and David W. Netzer, *Naval Postgraduate School* (8, 3, p. 721) Technical Note

B92-107 Relationships for Motor Temperature Sensitivity. R. E. Hamke, *Thiokol Corporation*; and J. R. Osborn, *Purdue University* (8, 3, p. 723) Technical Note

B92-108 Modeling of the Initial Droplet Size Distribution Function in the Spray Formed by Impinging Jets. H. S. Couto, D. Bastos-Netto and C. E. Migueis, *INPE—Brazilian Space Research Institute, Brazil* (8, 3, p. 725) Technical Note

B92-109 Planar Fluoresence Imaging of a Transverse Jet in a Supersonic Crossflow. M. P. Lee, B. K. McMillin, J. L. Palmer and R. K. Hanson, *Stanford University* (8, 3, p. 729) Article based on AIAA Paper 91-0460

B92-110 Effects of Compressiblity on the Atomization of Liquid Jets. Z. W. Zhou and S. P. Lin, *Clarkson University* (8, 3, p. 736) Article based on AIAA Paper 92-0429

B92-111 Solid-Propellant Erosive Burning. J. C. Godon, *Office National d'Etudes et de Recherches Aérospatiales, France*; J. Duterque, *Office National d'Etudes et de Recherches Aérospateiales, France*; and G. Lengellé, *Office National d'Etudes et de Recherches Aérospatiales, France* (8, 3, p. 741) Article based on AIAA Paper 87-2031

B92-112 Combustion Characteristics of AP/HTPB Propellants with Burning Rate Modifiers. S. Krishnan and R. Jeenu, *Indian Institute of Technology* (8, 3, p. 748) Article

B92-113 Development of a Generalized Failure Criterion for Viscoelastic Materials. K. L. Laheru, *Thiokol Corporation* (8, 3, p. 756) Article based on AIAA Paper 90-1970

B92-114 Ammonium Nitrate-Magnesium Propellant Combustion and Heat Transfer Mechanisms. M. Quinn Brewster, Todd A. Sheridan and Atsushi Ishihara, *University of Illinois* (8, 3, p. 760) Article based on AIAA Paper 91-2195

B92-115 Pulsed Thrust Propellant Reorientation: Concept and Modeling. John I. Hochstein, *Memphis State University*; Alfredo E. Patag and T. P. Korakianitis, *Washington University*; and David J. Chato, *NASA Lewis Research Center* (8, 3, p. 770) Article

B92-116 Medium-Frequency Impulsive-Thrust-Excited Slosh Waves During Propellant Reorientation with a Geyser. R. J. Hung, K. L. Shyu and C. C. Lee, *University of Alabama in Huntsville* (8, 3, p. 778) Article

B92-117 Advanced Tube-Bundle Rocket Thrust Chambers. John M. Kazaroff, *NASA Lewis Research Center*; and Albert J. Pavli, *Sverdrup Technology, Inc.* (8, 3, p. 786) Article based on AIAA Paper 90-2726

B92-118 Mixing and Combustion in a Spinning Combustor. K. J. Wilson, K. C. Schadow, E. Gutmark and R. A. Smith, *Naval Air Warfare Center* (8, 3, p. 792) Article

B92-119 Application of Computational Fluid Dynamics to Pitch/Yaw Thrust Vectoring Spherical Convergent Flap Nozzles. S. A. Syed, J. J. Erhart and E. W. King, *United Technologies, Pratt & Whitney* (8, 3, p. 799) Article based on AIAA Paper 90-2023

B92-120 Unsteady Airloading Panel Method for Propfans. D. B. Hanson, *United Technologies Corporation* (8, 3, p. 806) Article based on AIAA Paper 90-3914

B92-121 Numerical Analysis of Flow Through Oscillating Casacade Sections. Dennis L. Huff, *NASA Lewis Research Center* (8, 3, p. 815) Article based on AIAA Paper 89-0437

B92-122 Row-by-Row Off-Design Performance Calculation Method for Turbines. T. Schobeiri and M. Abouelkheir, *Texas A&M University* (8, 3, p. 823) Article based on AIAA Paper 91-2132

B92-123 Navier-Stokes Solutions of Transonic Nozzle Flow with Shock-Induced Flow Separations. Chih Fang Shieh, *Rohr Industries* (8, 3, p. 829) Article based on AIAA Paper 88-3614 CP888

B92-124 Aerodynamics of Viscous Flow in Counter-Rotating Finite Jets. W. J. Sheu and S. H. Sohrab, *Northwestern University*; and G. I. Sivashinsky, *City College of New York* (8, 3, p. 836) Article

B92-125 Viscous Flow Analysis of Advanced Particle Separators. M. Zedan, A. Mostafa, P. Hartman and A. Sehra, *Textron Lycoming* (8, 3, p. 843) Article

B92-126 Subcritical Flow Studies on Two-Dimensional External Compression Supersonic Inlets. K. Kapoor, T. G. Pai and B. N. Pamadi, *Indian Institute of Technology* (8, 3, p. 849) Article

B92-127 Numerical Investigation of Supersonic Inlet with Realistic Bleed and Bypass Systems. Akira Fujimoto and Nobuo Niwa, *Kawasaki Heavy Industries, Japan*; and Keisuke Sawada, *Tohoku University, Japan* (8, 4, p. 857) Article based on AIAA Paper 91-0127

B92-128 Bleed Boundary Conditions for Numerically Simulated Mixed-Compression Supersonic Inlet Flow. W. J. Chyu, G. W. Howe and T. I-P. Shih, *NASA Ames Research Center* (8, 4, p. 862) Article

B92-129 Lunar-Derived Titanium Alloys for Hydrogen Storage. S. Love and A. Hertzberg, *University of Washington*; and G. Woodcock, *Boeing Aerospace and Electronics* (8, 4, p. 869) Article

B92-130 U.S. Space Station Freedom Waste Gas Disposal System Trade Study. Brian A. Winters, *McDonnell Douglas Space Systems Company* (8, 4, p. 873) Article based on AIAA Paper 90-1944

B92-131 Electrode Performance Parameters for a Radioisotope-Powered AMTEC for Space Power Applications. M. L. Underwood, D. O'Connor, R. M. Williams, B. Jeffries-Nakamura, M. A. Ryan and C. P. Bankston, *Jet Propulsion Laboratory, California Institute of Technology* (8, 4, p. 878) Article

B92-132 Effectiveness of Plasma Torches for Ignition and Flameholding in Scramjet. Yukinori Sato, Masami Sayama and Katsura Ohwaki, *Ishikawajima-Harima Heavy Industries Company, Ltd., Japan*; Goro Masuya, Tomoyuki Komuro, Kenji Kudou, Atsuo Murakami, Kouichiro Tani and Yoshio Wakamatsu, *National Aerospace Laboratory, Japan*; Takeshi Kanda, *National Aerospace Laboratory, Japan*; Nobuo Chinzei, *National Aerospace Laboratory, Japan*; and Itsuro Kimura, *Tokai University, Japan* (8, 4, p. 883) Article based on AIAA Paper 89-2564

B92-133 Flow Establishment in a Generic Scramjet Combustor. P. A. Jacobs, *Institute for Computer Applications in Science and Engineering*; R. C. Rogers, E. H. Weidner and R. D. Bittner, *NASA Langley Research Center* (8, 4, p. 890) Article based on AIAA Paper 90-2096

B92-134 Hypersonic Mixing and Combustion Studies in the Hypulse Facility. R. J. Bakos, J. Tamagno, O. Rizkalla, M. V. Pulsonetti, W. Chinitz and J. I. Erdos, *General Applied Science Laboratories* (8, 4, p. 900) Article

B92-135 Propellant Production from the Martian Atmosphere. J. V. Bowles and M. E. Tauber, *NASA Ames Research Center*; A. J. Anagnost, *Stanford University*; and T. Whittaker, *Sterling Software* (8, 4, p. 907) Technical Note

B92-136 Indicial Method Calculating Dynamic Stall on a Vertical Axis Wind Turbine. Stephane R. Major, *Ecole Polytechnique de Montréal, Canada*; and Ion Paraschivoiu, *Ecole Polyechnique de Montréal, Canada* (8, 4, p. 909) Technical Note

B92-137 Comparison of 15-k We Water-Cooled Arcjet Test Results at Two Difference Facilities. E. Tosti, *BPD Difesa e Spazio, Italy*; H. O. Schrade, *Institut für Raumfahrtsysteme, Universitat Stuttgart, Germany*; and C. Petagna, *ESA/ESTEC, The Netherlands* (8, 4, p. 911) Technical Note based on AIAA Paper 90-2535

B92-138 Approach to Measurements of Flame Spreading over Solid Propellants. S. T. Thynell, I. T. Huang, C. S. Kuo, W. H. Hsieh and K. K. Kuo, *Pennsylvania State University* (8, 4, p. 914) Technical Note

B92-139 Nozzle Design Using Generalized One-Dimensional Flow. E. William Beans, *University of Toledo* (8, 4, p. 917) Article

B92-140 Numerical Simulation of Wick Diffusion Flames. S. H. Wu and L.-D. Chen, *University of Iowa* (8, 5, p. 921) Article based on AIAA Paper 91-0482

B92-141 Computational Study of a Supersonic Mixer-Ejector Exhaust System. T. J. Barber and O. L. Anderson, *United Technologies Research Center* (8, 5, p. 927) Article based on AIAA Paper 91-0126

B92-142 Spectrally Resolved Rayleigh Scattering Diagnostic for Hydrogen—Oxygen Rocket Plume Studies. R. G. Seasholtz, F. J. Zupanc and S. J. Schneider, *NASA Lewis Research Center* (8, 5, p. 935) Article based on AIAA Paper 91-0462

B92-143 Electric Field and Radio Frequency Measurements for Rocket Engine Health Monitoring Applications. Elizabeth L. Valenti, *Sverdrup Technology, Inc.* (8, 5, p. 943) Article

B92-144 Turbulent Diffusion Flame Properties Behind a Backward-Facing Step. M. Z. Wu, R. E. Walterick, W. A. de Groot, J. I. Jagoda and W. C. Strahle, *Georgia Institute of Technology* (8, 5, p. 948) Article based on AIAA Paper 91-0079

B92-145 Measured Particulate Behavior in a Subscale Solid Propellant Rocket Motor. W. D. Brennan, D. L. Hovland and D. W. Netzer, *Naval Postgraduate School* (8, 5, p. 954) Article

B92-146 Calculation of Particle Trajectories in Solid-Rocket Motors with Arbitrary Acceleration. Jayant S. Sabnis, Frederik J. de Jong and Howard J. Gibeling, *Scientific Research Associates, Inc.* (8, 5, p. 961) Article based on AIAA Paper 91-3392

B92-147 Dry Lubrication Applied to the HM7 Engine Hydrogen Bearing. N. Marchal, P. Caisso, P. Alliot and A. Souchier, *Société Européenne de Propulsion, France* (8, 5, p. 968) Article based on AIAA Paper 90-2254

B92-148 Satellite Propulsion Performance Modeling Using Flight Data. R. P. Prickett, *INTELSAT*; and J. V. Hoang, *Hughes Aircraft Company* (8, 5, p. 971) Article based on AIAA Paper 88-2921

B92-149 Effect of Flow Rate on the Spray Characteristics of Impinging Water Jets. P. Vassallo and N. Ashgriz, *State University of New York*; and F. A. Boorady, *Atlantic Research Corporation* (8, 5, p. 980) Article

B92-150 Medium-Frequency Impulsive-Thrust-Activated Liquid Hydrogen Reorientation with Geyser. R. J. Hung and K. L. Shyu, *University of Alabama in Huntsville* (8, 5, p. 987) Article

B92-151 Bipropellant Combustion in a Liquid Rocket Combustion Chamber. Tsung Leo Jiang and Huei-Huang Chiu, *National Cheng Kung University, Taiwan, ROC* (8, 5, p. 995) Article

B92-152 Investigation of Solid-Fuel, Dual-Mode Combustion Ramjets. C. Vaught, M. Witt and D. Netzer, *Naval Postgraduate School*; and A. Gany, *Technion—Israel Institute of Technology* (8, 5, p. 1004) Article

B92-153 Numerical Study of Low-Current Steady Arcs. S. C. Kim, *Sverdrup Technology, Inc.*; and H. T. Nagamatsu, *Rensselaer Polytechnic Institute* (8, 5, p. 1012) Article

B92-154 Microwave Waveguide Helium Plasmas for Electrothermal Propulsion. Juergen Mueller and Michael M. Micci, *Pennsylvania State University* (8, 5, p. 1017) Article

B92-155 Plasma Flow Processes Within Magnetic Nozzle Configurations. Thomas M. York, *Ohio State University*; Barry A. Jacoby and Pavlos Mikellides, *Lawrence Livermore National Laboratory* (8, 5, p. 1023) Article based on AIAA Paper 89-2711

B92-156 Quasi-One-Dimensional Numerical Simulation of Magnetoplasmadynamic Thrusters. Eliahu H. Niewood and Manuel Martinez-Sanchez, *Massachusetts Institute of Technology* (8, 5, p. 1031) Article based on AIAA Paper 90-2604

B92-157 Directions in Turbulence Modeling for In-Cylinder Flows in Reciprocating Engines. S. H. El Tahry and D. C. Haworth, *General Motors Research Laboratories* (8, 5, p. 1040) Article based on AIAA Paper 91-0516

B92-158 Effects of Vortex Generators on the Growth of a Compressible Shear Layer. D. S. Dolling, E. Fournier and Y. R. Shau, *University of Texas at Austin* (8, 5, p. 1049) Article based on AIAA Paper 90-1979

B92-159 Least-Squares/Parabolized Navier-Stokes Procedure for Optimizing Hypersonic WInd-Tunnel Nozzles. John J. Korte and Ajay Kumar, *NASA Langley Research Center*; D. J. Singh, *Analytical Services and Materials, Inc.*; and B. Grossman, *Virginia Polytechnic Institute and State University* (8, 5, p. 1057) Article based on AIAA Paper 91-2273

B92-160 Experimental Verification of a Secondary Recirculation Zone in a Labyrinth Seal. G. L. Morrison, *Texas A&M University*; M. C. Johnson, *Allied-Signal Corporation*; and G. B. Tatterson, *North Carolina A&T State University* (8, 5, p. 1064) Article based on AIAA Paper 88-3692 CP888

B92-161 Full Navier-Stokes Analysis of a Three-Dimensional Scramjet Inlet. Yeu-chuan Hsia, Endwell O. Daso and Vidya A. Padhye, *Rockwell International Corporation* (8, 5, p. 1071) Article based on AIAA Paper 91-0129

B92-162 Application of an Unsteady Navier-Stokes Solver to Transonic Turbine Design. Akil A. Rangwalla and Nateri K. Madavan, *NASA Ames Research Center*; and Paul Dean Johnson, *Pratt and Whitney* (8, 5, p. 1079) Article based on AIAA Paper 91-2468

B92-163 Magnesium Fluoride as Energy Storage Medium for Spacecraft Solar Thermal Power Systems. Charles A. Lurio, *Aerodyne Research, Inc.* (8, 5, p. 1087) Article

B92-164 Application of a Model-Reference Adaptive Controller to a Space Nuclear Power System. John D. Metzger, *Grumman Space and Electronics Division*; and Mohamed S. El-Genk, *University of New Mexico* (8, 5, p. 1093) Article

B92-165 Full System Engineering Design and Operation of an Oxygen Plant. James Colvin, Paul Schallhorn and Kumar Ramohalli, *UA/NASA Space Engineering Research Center* (8, 5, p. 1103) Article based on AIAA Paper 91-2444

B92-166 Active Control of Unsteady Combustion-Induced Oscillations. Anil Gulati and Ramani Mani, *General Electric Company* (8, 5, p. 1109) Article based on AIAA Paper 90-0270

B92-167 Some Readily Quantifiable Aspects of Scramjet Engine Performance. Jack L. Kerrebrock, *Massachusetts Institute of Technology* (8, 5, p. 1116) Article

B92-168 Investigation of CO2 Laser-Sustained Hydrogen Plasmas. A. Mertogul, D. Zerkle and H. Krier, *University of Illinois at Urbana—Champaign* (8, 5, p. 1123) Technical Note based on AIAA Paper 90-2637

B92-169 Unsteady Internal Ballistic Calculations of Solid Rocket Motors. H. Tuğrul Tinaztepe, *Roketsan Missiles Industries Inc, Turkey*; İ Sinan Akmandor and Ahmet Ş Üçer, *Middle East Technical University, Turkey* (8, 5, p. 1125) Technical Note based on AIAA Paper 91-2425

B92-170 Measured Effect of Step Axial Location on Labyrinth Seal Leakage. G. L. Morrison and D. L. Rhode, *Texas A&M University* (8, 6, p. 1129) Synoptic

B92-171 Prediction of LI-SF6 Wick Combustion. H.-Y. Lyu, L.-D. Chen and K.-Y. Hsu, *University of Iowa* (8, 6, p. 1131) Article

B92-172 Flame Stabilization in High-Velocity Heterogeneous Fuel-Air Mixtures. M. R. Baxter and A. H. Lefebvre, *Purdue University* (8, 6, p. 1138) Article

B92-173 Carbon Monoxide Emissions in Lean Premixed Combustion. Sanjay M. Correa, *General Electric* (8, 6, p. 1144) Article

B92-174 Experimental Techniques for the Assessment of Fuel Thermal Stability. J. S. Chin and A. H. Lefebvre, *Purdue University* (8, 6, p. 1152) Article based on AIAA Paper 92-0685

B92-175 Dispersed-Phase Structure of Pressure-Atomized Sprays at Various Gas Densities. L. K. Tseng, P. K. Wu and G. M. Faeth, *University of Michigan* (8, 6, p. 1157) Article based on AIAA Paper 92-0230

B92-176 Rotational Inviscid Flow in Laterally Burning Solid-Propellant Rocket Motors. G. Balakrishnan, *University of California, San Diego*; San Diego Liñán A., *University of California*; and F. A. Williams, *University of California, San Diego* (8, 6, p. 1167) Article

B92-177 Aluminum Agglomeration in Ammonium Perchlorate/Cyclotrimethylene Trinitramine/Aluminum/Hydroxy-Terminated Polybutadiene Propellant Combustion. Tai-Kang Liu, *Chung Shan Institute of Science and Technology, Taiwan, ROC*; Huey-Cherng Perng, *Chung Shan Instiute of Science and Technology, Taiwan, ROC*; Song-Ping Luh and Fang Liu, *Chung Shan Institute of Science and Technology, Taiwan, ROC* (8, 6, p. 1177) Article

B92-178 Magnesium-Neutralized Propellant. Daniel W. Doll and Gary K. Lund, *Thiokol Corporation* (8, 6, p. 1185) Article based on AIAA Paper 91-2560

B92-179 Metallized Propellants for the Human Exploration of Mars. Bryan Palaszewski, *NASA Lewis Research Center* (8, 6, p. 1192) Article

B92-180 Hydrocarbon-Fuel/Copper Combustion Chamber Liner Compatibility, Corrosion Prevention, and Refurbishment. S. D. Rosenberg, M. L. Gage, G. D. Homer and J. E. Franklin, *Aerojet Propulsion Division* (8, 6, p. 1200) Article based on AIAA Paper 91-2213

B92-181 Magnetosonic Condition in Magnetoplasmadynamic Flow. Kyoichi Kuriki and Takayuki Nakayama, *Institute of Space and Astronautical Science, Japan* (8, 6, p. 1208) Article based on AIAA Paper 90-2605

B92-182 Hall Current Ion-Thruster Performance. Kimiya Komurasaki and Yoshihiro Arakawa, *University of Tokyo, Japan* (8, 6, p. 1212) Article based on AIAA Paper 90-2594

B92-183 Quantitative Imaging of the Magnetoplasmadynamic Flowfield. Takayuki Nakayama, Kyoichiro Toki and Kyoichi Kuriki, *Institute of Space and Astronautical Science, Japan* (8, 6, p. 1217) Article

B92-184 Anode Power Deposition in Quasisteady Magnetoplasmadynamic Thrusters. A. D. Gallimore, A. J. Kelly and R. G. Jahn, *Princeton University* (8, 6, p. 1224) Article based on AIAA Paper 90-2668

B92-185 Experimental Investigation of an Axisymmetric Hypersonic Scramjet Inlet for Laser Propulsion. R. A. Jones, L. N. Myrabo and H. T. Nagamatsu, *Rensselaer Polytechnic Institute*; and M. A. S. Minucci, *Centro Tecnico Aeroespacial, Brazil* (8, 6, p. 1232) Article based on AIAA Paper 91-0012

B92-186 Confined Jet Thrust Vector Control Nozzle Studies. J. H. Friddell and M. E. Franke, *Air Force Institute of Technology, Wright-Patterson AFB* (8, 6, p. 1239) Article based on AIAA Paper 90-2027

B92-187 Axial Length Influence on the Performance of Centrifugal Impellers. S. N. J. Al-Zubaidy, *United Arab Emirates University* (8, 6, p. 1245) Article

B92-188 Noncoaxial Mixing in a Rectangular Duct. T.-M. Liou, K.-L. Hsiao and M.-K. Tsai, *National Tsing Hua University, Taiwan, ROC* (8, 6, p. 1252) Article

B92-189 Generic Developmental Turbojet Fuel Control. J. S. Lilley, *U.S. Army Missile Command*; S. L. Pengelly and P. Fisher, *Boeing Defense and Space Group* (8, 6, p. 1258) Article based on AIAA Paper 91-3399

B92-190 Study on Vortex Flow Control of Inlet Distortion. Bernhard H. Anderson, *NASA Lewis Research Center*; Pao S. Huang, William A. Paschal and Enrico Cavatorta, *Dee Howard Company* (8, 6, p. 1266) Article based on AIAA Paper 92-0152

B92-191 Maximum Life Spur Gear Design. M. Savage and B. J. Mackulin, *University of Akron*; H. H. Coe and J. J. Coy, *NASA Lewis Research Center* (8, 6, p. 1273) Article based on AIAA Paper 91-2021

B92-192 Active Control of Nonlinear Pressure Oscillations in Combustion Chambers. Youn-Tih Fung and Vigor Yang, *Pennsylvania State University* (8, 6, p. 1282) Article

B92-193 Mixing and Combustion Studies Using Discrete Orifice Injection at Hypervelocity Flight Conditions. R. Bakos, J. Tamagno, R. Trucco, O. Rizkalla, W. Chinitz and J. I. Erdos, *General Applied Science Laboratories, Inc.* (8, 6, p. 1290) Article based on AIAA Paper 91-2396

B92-194 Electrostatic Propulsion Using C60 Molecules. Stephanie D. Leifer, Donald Rapp and Winston A. Saunders, *Jet Propulsion Laboratory, California Institute of Technology* (8, 6, p. 1297) Technical Note
